

# Hermes Networks SD-WAN

## 360 GUARD OVERVIEW

Hermes Network 360 Guard is a cutting-edge security solution that integrates multiple advanced technologies to provide a comprehensive shield for modern networks. By combining Secure Access Service Edge (SASE), Remote Monitoring and Management (RMM), and Extended Detection and Response (XDR), Hermes Network 360 Guard offers a robust and adaptable defense system against evolving cyber threats.

### Key Features

**SASE Integration:** Hermes Network 360 Guard leverages the principles of SASE to deliver a unified and cloud-native security approach. This enables secure access to network resources from any location while enforcing consistent security policies across the entire network infrastructure.

**RMM Capabilities:** The Remote Monitoring and Management functionality provides real-time oversight and control over network devices and endpoints. It ensures continuous monitoring, proactive maintenance, and swift response to any potential issues, enhancing overall network performance and security posture.

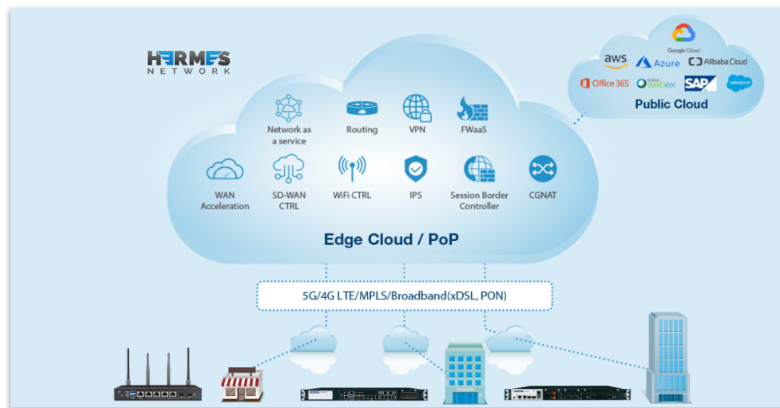

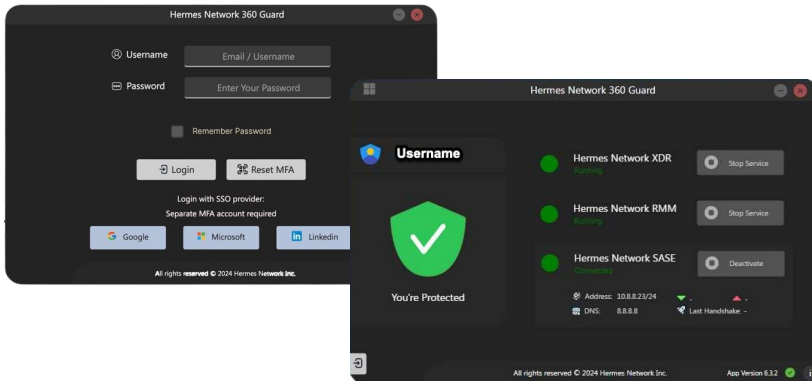

**XDR Enhancement:** With Extended Detection and Response capabilities, Hermes Network 360 Guard offers a multi-layered defense mechanism. It amalgamates endpoint protection, detection, investigation, and response into a cohesive system, allowing for comprehensive threat detection and rapid incident response.

### BENEFITS

- **Holistic Security Approach:**  
By combining SASE, RMM, and XDR, Hermes Network 360 Guard offers a holistic approach to network security, ensuring comprehensive protection against a wide range of threats.
- **Enhanced Visibility and Control:**  
The solution provides deep visibility into network activities, allowing for proactive identification and mitigation of potential security risks. Additionally, it offers granular control over network resources and endpoints.
- **Scalability and Adaptability:**  
Hermes Network 360 Guard is designed to scale effortlessly according to the evolving needs of modern networks. Its adaptable nature ensures seamless integration with existing infrastructure and future technologies.
- **Streamlined Management:**  
Through centralized management and automation capabilities, the solution simplifies security operations, reducing the burden on IT teams and enhancing operational efficiency.

## HERMES NETWORK 360 GUARD BRIEF

Hermes Network 360 Guard stands at the forefront of modern network security, offering a comprehensive suite of SASE, RMM, and XDR capabilities. By integrating these technologies, it empowers organizations to fortify their networks against evolving cyber threats while maintaining agility, scalability, and operational efficiency.

### USE CASES

#### Enterprise Networks:

Hermes Network 360 Guard is ideal for securing large-scale enterprise networks with distributed architecture, ensuring seamless connectivity and robust protection across multiple locations.

#### Remote Workforce Security:

Its SASE features make it an optimal choice for safeguarding remote workforce connections, allowing secure access to corporate resources from any location without compromising security.

#### Threat Detection and Response:

The XDR capabilities are instrumental in swiftly identifying and mitigating advanced threats, minimizing potential damages and downtime.

**About Hermes Network Inc.** | Hermes Network ([www.hermesnetwork.cloud](http://www.hermesnetwork.cloud)) brings a unique combination of groundbreaking technologies and unmatched networking expertise to the enterprise and telecommunications industries. The Silicon Valley-based business has applied radically new thinking to the problem of delivering massively scalable and highly programmable SDN solutions within and across the datacenter and out to the wide area network with the security and availability required by business-critical environments. Hermes Network, backed by the rapidly growing IP/Optical Net-works business of major carriers and data centers, has the pedigree to serve the needs of the world's biggest clouds. The cloud has made promises—the mission of Hermes Network is to help you realize them. Discover more at [Hermesnetwork.cloud](http://Hermesnetwork.cloud).
